shanghai s january revolution was a highly visible and by all accounts crucially important event in china s cultural revolution its occurrence along with the subsequent attempt to establish a commune form of municipal government has greatly shaped our understanding both of the goals originally envisaged for the cultural revolution by its leaders and of the political positions held by the new corps of party leaders thrust upward during its course most notably chang ch un ch iao at this interpretive level the events in shanghai seem to embody in microcosm the issues and conflicts in chinese politics during the cultural revolution as a whole while at the same time shaping our conception of what these larger issues and conflicts were at the more general theoretical level however

the events in shanghai provide us with an unusual opportunity thanks to red guard raids on party offices to view the internal workings of the party organization under a period of stress and to observe unrestrained interest group formation and mass political conflict through the press accounts provided by these unofficial groups themselves the january revolution thus provides us with an opportunity to develop better our more abstract theoretical understanding of the functioning of the chinese political system and the dynamics of the social system in which it operates 1

chinese politics are at a crossroads as president xi jinping amasses personal power and tests the constraints of collective leadership in the years since he became general secretary of the chinese communist party in 2012 xi jinping has surprised many people in china and around the world with his bold anti corruption campaign and his aggressive consolidation of power given these new developments we must rethink how we analyze chinese politics an urgent task as china now has more influence on the global economy and regional security than at any other time in modern history chinese politics in the xi jinping era examines how the structure and dynamics of party leadership have evolved since the late 1990s and argues that inner party democracy the concept of collective leadership that emphasizes deal making based on accepted rules and norms may pave the way for greater transformation within china s political system xi s legacy will largely depend on whether he encourages or obstructs this trend of political institutionalization in the governance of the world s most populous and increasingly pluralistic country cheng li also addresses the recruitment and composition of the political elite a central concern in chinese politics china analysts will benefit from the meticulously detailed biographical information of the 376 members of the 18th central committee including tables and charts detailing their family background education occupation career patterns and mentor patron ties
